

Investment Objective

Target Return: Schedule A Bank 5-Year GIC + 3%.

To provide investors access to the Canadian alternative mortgage market as a well-managed and conservative fund.

From the Desk of the CEO

With investors balking at volatility, while at the same time looking for higher yield, it is time to look at mortgage-based funds as a low-risk investment that provides the return traditional fixed-income products cannot. They are an overlooked but important asset class for a well-balanced portfolio. Our fund was designed specifically to meet that need of our portfolio clients.

Frontenac is a well-diversified mortgage pool that is professionally managed by our team of experts, with the mandate to provide capital preservation with a reasonable return. Those who invest in Frontenac gain access to a pool of well diversified mortgages, primarily first charge position, without leverage, in the stable residential real estate market of Ontario. Our strategy for the fund consists of lending short-term mortgages and providing intelligent lending solutions to borrowers who do not qualify for traditional bank financing.

Our purpose is to service this space and to find good quality mortgages that provide a return for our investors matching the Schedule A Bank 5-Year GIC + 3% in the current environment. This fund provides a secure income-producing vehicle that is well-diversified with real asset security. Returns are not directly correlated to interest rate or equity volatility.

Frontenac Mortgage Investment Corporation has been designed for the conservative investor that understands the value of holding an income-producing vehicle for the long term. Our management team are real estate and credit experts with an outstanding track record of over 30 consecutive years of positive returns. We gained our reputation over this time by gaining the trust of our clients through competency, consistency and taking care in what we do.

—Matthew Robinson
